

EWLive 2024: Prevailing in the EME

17-19 September 2024
in Tartu, Estonia

DELIVERING KNOWLEDGE THROUGH LIVE DEMONSTRATIONS

Tangent Link in cooperation with the Estonian Ministry of Defence, and the Estonian Defence Forces is delighted to invite you to EWLive: Prevailing in the EME. This is the 5th addition of EWLive, which has expanded to encompass key elements of the EME (Electro-Magnetic Environment). This has become a 'must attend' event for Defence and Security industry stakeholders to gain knowledge through a live demonstration setting.

EWLive series has proven track record of high ROI outcomes.

OPPORTUNITY

EWLive is an excellent opportunity for companies to demonstrate and deliver a visual reference to enhance the quality of their technology presentation. The live approach gives military end users from over 30 nations a hands on experience, not a simple sales pitch at a trade show, to help them understand the technology available and how it can address their capability requirements.

THE PLATFORM

EWLive demonstrations take place at a secure facility, Ülenurme Airport, Tartu, Estonia. NATO and NATO friendly countries who have significant future requirements to improve their EW/EME/CEMA capability, will be invited to attend these demonstrations. Each military delegation will be matched according to subject matter expertise, with a commercial demonstration to ensure the maximum learning outcomes are achieved during each live session.

Demonstrate your EME capabilities in a field or classroom environment, in these technologies:
